

Hello all,

So, spring is finally here, and I am so pleased that the weather is warming up (even here in the North East). March has again been a busy month with me spending time working in the office and also making more contacts and visiting Assessment Centres. For the ones I have not yet visited I hope to see you all soon. If you would like to contact me to arrange a visit my details are below.

Email: julie.southern@microlinkpc.com or Mobile 07759 002 110

Wishing you all a Happy Easter and I hope you enjoy this month's DSA Newsletter.

[Assistive microphone for students](#)

There are two major issues students and teachers face when using speech recognition in the classroom. Privacy and accuracy.

How can a student use their voice in a classroom setting without being overheard by fellow students and at the same time eliminate all the chitter chatter and background noise that goes with it to attain optimal speech recognition accuracy rates?

Stenomask is a microphone that enables students to use speech recognition and verbally communicate in school, home and public privately and accurately. Talk Technologies is seeing a dramatic increase in educators embracing this technology in the classroom. Students with physical impairments and learning disorders can now freely and confidently complete their work alongside classmates, giving them a leg up as speech recognition can really help improve productivity and engagement.
